SAFETY INFORMATION

CAUTION

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual.
Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

WARNING

Lead in solder used in this product is listed by the California Health and Welfare agency as a known reproductive toxicant which may cause birth defects or other reproductive harm (California Health & Safety Code, Section 25249.5). When servicing or handling circuit boards and other components which contain lead in solder, avoid unprotected skin contact with the solder. Also, when soldering do not inhale any smoke or fumes produced.

SPECIFICATIONS

General
Power source ..... 14.4 V DC (10.8 – 15.6 V allowable)
Grounding system ..... Negative type
Max. current consumption ..... 7.5 A
Dimensions (chassis) ..... 178(W) × 50(H) × 150(D) mm
[7(W) × 2(H) × 5-7/8(D) in.]
(nose) ..... 188(W) × 58(H) × 18(D) mm
[7-3/8(W) × 2-1/4(H) × 3/4(D) in.]
Weight ..... 1.6 kg (3.5 lbs.)

Amplifier (KEH-M650/US, KEH-M8200/US, KEH-M8250/CA)

Continuous power output is 10 W per channel min. into 4 ohms, both channels driven 50 to 15,000 Hz with no more than 5% THD.
Maximum power output ..... 25 W × 2/15 W × 4 (EIAJ)
Load impedance ..... 4 Ω (4 – 8 Ω allowable)
Preout output level/impedance ..... 500 mV/1 kΩ
Tone controls (bass) ..... ±10 dB (100 Hz)
(middle) ..... ±10 dB (1 kHz)
(treble) ..... ±10 dB (10 kHz)
Loudness contour ..... +10 dB (100 Hz), +7 dB (10 kHz) (volume: –30 dB)

Amplifier (KEH-M8250/ES)

Maximum power output ..... 25W × 2/15W × 4 (EIAJ)
Continuous power output ..... 11W × 2 (1% dist. at 1kHz)
Continuous power output is 10W per channel min. into 4 ohms, both channels driven 50 to 15,000Hz with no more than 5% THD.
Load impedance ..... 4Ω (4 – 8Ω allowable)
Max. output level/output impedance (pre out) ..... 500mV/1k Ω
Tone controls (bass) ..... ± 10dB (100Hz)
(middle) ..... ± 10dB (1kHz)
(treble) ..... ± 10dB (10kHz)
Loudness contour ..... + 10dB (100Hz), + 7dB (10kHz) (volume : – 30dB)

Tape player (KEH-M650/US, KEH-M8250/CA)
Tape ..... Compact cassette tape (C-30 – C-90)
Tape speed ..... 4.76cm/sec. (+ 0.14cm/sec. – 0.05cm/sec.)
Fast forward/rewind time ..... Approx. 100sec. for C-60
Wow & flutter ..... 0.08% (WRMS)
Frequency response ..... Metal : 30 – 22,000Hz (± 3dB)
Stereo separation 45dB
Signal-to-noise ratio ..... Metal : Dolby C NR IN : 71dB (IHF-A network)
Dolby B NR IN : 65dB (IHF-A network)
Dolby NR OUT : 57dB (IHF-A network)

Tape player (KEH-M8200/US)
Tape ..... Compact cassette tape (C-30 – C-90)
Tape speed ..... 4.76cm/sec. (+ 0.14cm/sec. – 0.05cm/sec.)
Fast forward/rewind time ..... Approx. 100sec. for C-60
Wow & flutter ..... 0.08% (WRMS)
Frequency response ..... Metal : 30 – 19,000Hz (± 3dB)
Stereo separation 45dB
Signal-to-noise ratio ..... Metal : Dolby C NR IN : 71dB (IHF-A network)
Dolby B NR IN : 65dB (IHF-A network)
Dolby NR OUT : 57dB (IHF-A network)

Tape player (KEH-M8250/ES)
Tape ..... Compact cassette tape (C-30 – C-90)
Tape speed ..... 4.76cm/sec. (+ 0.14cm/sec. – 0.05cm/sec.)
Fast forward/rewind time ..... Approx. 100sec. for C-60
Wow & flutter ..... 0.08% (WRMS)
Frequency response ..... Metal : 30 – 19,000Hz (± 3dB)
Stereo separation 45dB
Signal-to-noise ratio ..... Metal : Dolby B NR IN : 65dB (IEC-A network)
Dolby NR OUT : 57dB (IEC-A network)

• US, CA Model

FM tuner
Frequency range ..... 87.9 – 107.9 MHz
Usable sensitivity ..... 11 dBf (1.0 μV/75 Ω, mono, S/N: 30 dB)
50 dB quieting sensitivity ..... 16 dBf (1.7 μV/75 Ω, mono)
Signal-to-noise ratio ..... 70 dB (IHF-A network)
Distortion ..... 0.3% (at 65 dBf, 1 kHz, stereo)
Frequency response ..... 30 – 15,000 Hz (±3 dB)
Stereo separation ..... 40 dB (at 65 dBf, 1 kHz)
Selectivity ..... 70 dB (2ACA) (±400 kHz)
Three-signal intermodulation
(desire signal level) ..... 50 dBf (two undesire signal level: 110 dBf)

AM tuner
Frequency range ..... 530 – 1,710 kHz
Usable sensitivity ..... 18 μV (25 dB) (S/N: 20 dB)
Selectivity ..... 50 dB (±10 kHz)

• ES Model

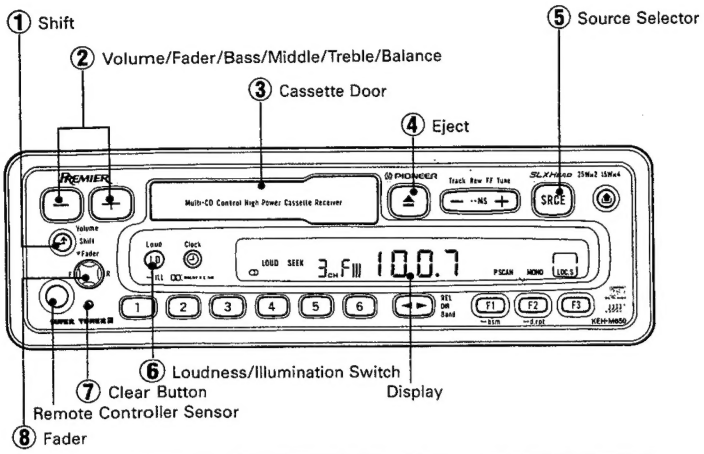
FM tuner
Frequency range ..... 87.5 – 108MHz
Usable sensitivity ..... 11dBf (1.0μV/75 Ω, mono, S/N : 30dB)
50dB quieting sensitivity ..... 16dBf (1.7μV/75 Ω, mono)
Signal-to-noise ratio ..... 70dB (IEC-A network)
Distortion ..... 0.3% (at 65dBf, 1kHz, stereo)
Frequency response ..... 30 – 15,000Hz (± 3dB)
Stereo separation ..... 40dB (at 65dBf, 1kHz)

AM tuner
Frequency range ..... 531 – 1,602kHz (9kHz)
530 – 1,710kHz (10kHz)
Usable sensitivity ..... 18μV (25dB) (S/N : 20dB)
Selectivity ..... 50dB (± 9kHz)
50dB (± 10kHz)

These specifications were determined and are presented in accordance with specification standards established by the Ad Hoc Committee of Car Stereo Manufacturers.

Note:
Specifications and the design are subject to possible modification without notice due to improvements.

1. SWITCHING POWER ON/ADJUSTING VOLUME AND TONE



Using the Clear Button

Once all wiring is complete, press Button ⑦ with a thin, pointed object. Though not a normal occurrence, the microprocessor which controls the operation of this unit can be affected by electrostatic noise. This generally is indicated by such symptoms as no power being supplied when you switch the unit on, failure of buttons and controls, or an abnormal display. Should this happen, press Button ⑦ with a thin, pointed object to reset the microprocessor. Note that doing so also resets all audio controls, so you will have to make any desired settings again. This operation deletes all memory contents, such as frequencies stored in the preset memory, so you will have to make any desired settings again.

Switching Power On

Radio

Press Button ⑤ to switch the tuner power on. Press Button ⑤ again to switch the power off.

Tape

Insert the cassette tape through the Cassette Door ③, and the power will be automatically turned on to get the tape start being played back. To eject the tape, press the Button ④.

- You will hear a few consecutive clicks from your unit when you have started the engine with the cassette tape inserted. The sounds are only the sign of your unit's mechanical preparation being made, but does not indicate at all its functional failure.

Changing the Source

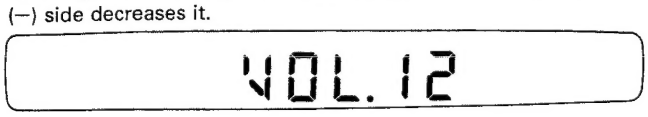
When the cassette tape is inserted, the source changes at each press of the Button ⑤: Tape → Radio → OFF. When a Multi-Play CD Player—optionally available Multi-Play CD Player CDX-M60, for example—is connected to your unit, the source changes: Multi-Play CD Player → Tape → Radio → OFF.

Adjusting Volume/Fader/Bass/Middle/Treble/Balance

To adjust volume, press the Button ②. The display changes at each press of the Button ①: Volume → Fader → Bass → Middle → Treble → Balance. Press the Button ② to adjust the displayed mode.

Adjusting Volume

Pressing the (+) side of Button ② increases the volume, while the (−) side decreases it.



Adjusting the Fader

This fader controls the balance between speakers [1], [2], and [3], and speakers [4], which are shown in Figure. Press the (−) side of Button ② to raise the volume of speakers [1], [2] and [3] only; press the (+) side to raise the volume of speakers [4] only.

- The unit has two faders: the electronic preamp fader and the power fader controlled by Fader Control Knob ⑧. The use of both faders depend on the way the speakers are connected. For details, see "Using the Fader".

Adjusting Bass

Pressing the (+) side of Button ② increases bass, while the (−) side decreases bass.

Adjusting Middle

Pressing the (+) side of Button ② increases middle, while the (−) side decreases middle.

Adjusting Treble

Pressing the (+) side of Button ② increases treble, while the (−) side decreases treble.

Adjusting Balance

Pressing the (−) side of Button ② shifts the balance to the left speaker, while the (+) side shifts it to the right speaker.

- When you're adjusting fader, bass, middle, treble, or balance settings, the indicator will stop at the center setting. About 5 seconds after adjustment has been made, the display returns to its previous state.

Using the Loudness Function

Press Button ⑥ and the **"LOUD"** indicator will appear on the display. This "loudness" function enhances both the high and low ranges of sound to give even more power to output even at low volumes.

Switching Illumination Colour

You can select either green or amber for the switch illumination color. To switch the color, hold down Button ⑥ for two seconds. Pressing Clear Button ⑦ causes the illumination to be turned green.

Using Source Level Adjustor

You may wish to adjust volume when you have changed the source to radio, tape, or CD or when you have changed the radio band from FM to AM. You can do so on the basis of the volume of FM as follows:

1. Use the Button ⑤ to change the source. (In case of radio, change the band to AM.)
2. Hold down the Button ① for about 2 seconds, and the display will show you the volume of the source.

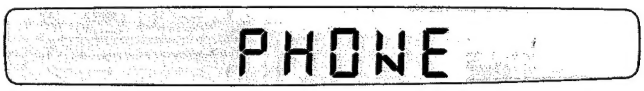
3. To increase the volume, press the (+) side of the Button ②, and the decrease press the (—) side. You can adjust the volume within a span of V — 4 and V + 4. The display automatically returns to the previous showing when five seconds have elapsed after the adjustment.

- No adjustment can be made when an FM station is tuned in.

Regarding the Cellular Telephone Muting

When the audio mute terminal of a separately sold PIONEER cellular telephone is connected to the cellular mute terminal of the unit, the following function becomes active.

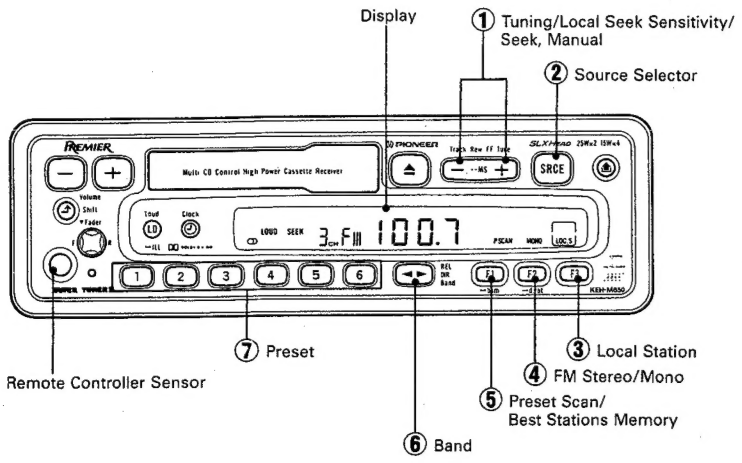
When a phone call is received or made on the cellular telephone, the volume is automatically lowered by the unit, and PHONE is shown on the display.

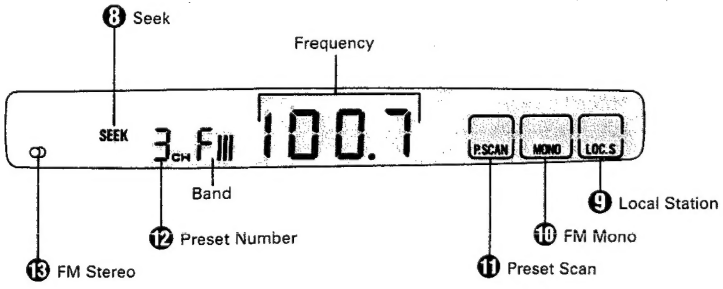


When a call is ended, the volume returns to the previous level and the previous display is shown again.

- When the volume is lowered by the operation of the cellular telephone muting function (**"PHONE"** is shown on the display), the unit's shift Button ① and the attenuator button of the remote controller unit are disabled.

2. USING THE RADIO





1 Press Button ② to switch the radio power on.

2 Press Button ⑥ to select a band.

$F_I \rightarrow F_{II} \rightarrow F_{III} \rightarrow A_I$
(FM1) (FM2) (FM3) (AM)

3 Use seek tuning to tune in a frequency.

Confirm that the **"SEEK"** indicator ⑧ is shown on the display (if not, press the (+) and (—) sides of Button ① at the same time). Press the (+) side of Button ① to automatically tune in the next higher receivable frequency, and the (—) side for a lower frequency.

4 Adjust volume and tone (see page 3).

5 Assign the tuned frequency to one of the buttons in Bank ⑦ (preset memory).

Press and hold down one of the buttons in Bnak ⑦ for at least two seconds. The frequency is assigned to the selected button when the Preset Number ⑫ stops flashing on the display. Up to 18 FM stations (6 each for FM1, FM2 and FM3), and six AM stations can be assigned to the preset memory buttons in Bank ⑦.

6 Once a frequency is assigned to a button in Bank ⑦, you just need to press that button to tune it in.

This also causes the number of the button pressed to appear at Position ⑫ on the display.

Preset Scan Tuning

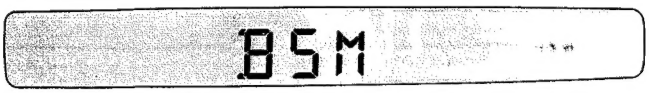
This function lets you automatically monitor the stations assigned to the preset buttons.

1. Pressing Button ⑤ turns on the frame of Preset Scan ⑪ and flashes Preset Number ⑫.
   Each station assigned to the buttons in Bank ⑦ will be automatically tuned in for about eight seconds.
2. When you hear a station that you like, press Button ⑤ again to cancel preset scan tuning and remain at that station.

BSM (Best Stations Memory)

This function automatically locates stronger stations and automatically assigns their frequencies to the buttons in Bank ⑦, from strongest to weakest. It comes in handy when trying to find local stations while driving.

1. Press Button ⑥ and select a band.
2. Hold down Button ⑤. After about two seconds, a "beep" will sound to signal that the BSM search has started. At this time, **"BSM"** will flash on the display.



3. The frequency display will return once BSM search is complete, and frequencies are assigned to buttons 1 through 6 in Bank ⑦.

- At the end of the BSM search, the displayed frequency is that assigned to Button [1] of Bank ⑦.
- If there are fewer than six strong stations in the area, some of the buttons in Bank ⑦ will not be assigned frequencies, so they will retain any frequencies assigned to them previously.
- BSM search may take as long as 30 seconds in areas where there are few strong stations.
- You can cancel BSM search by pressing Button ⑥.

Manual Tuning

Use manual tuning when stations are too weak to be picked up by seek tuning.

1. Press both (+) and (−) sides of Button ① at the same time to clear **"SEEK"** ⑧.
2. Each press of the (+) side of Button ① increases the frequency in 0.2 MHz steps in the FM band, 10 kHz in the AM band. Pressing the (−) side of Button ① decreases the frequency. Holding down either side of Button ① changes the frequency at high speed.

Switching between FM stereo and Mono

Generally, it is best to allow the "Super Tuner Ⅲ" function to automatically set the optimum listening conditions. ⓒⓓ ⑬ turns on during stereo broadcast is in reception. When there is a large amount of noise, you can press Button ④ for clearer mono reception (The frame of FM Mono ⑩ turns on).

Adjusting Seek Sensitivity

The seek tuning function of this tuner lets you select between a local setting for reception of strong stations only, and a DX (distant) setting for reception of weaker stations. The local setting also has four seek tuning sensitivity levels for FM and two levels for AM to match local conditions.

Changing the Local Seek Sensitivity

1. Use Button ⑥ to select a band.
2. Hold down the Button ③ for more than two seconds, and the display will show you the current local seek sensitivity for about five seconds.

(Example: LOC-2)

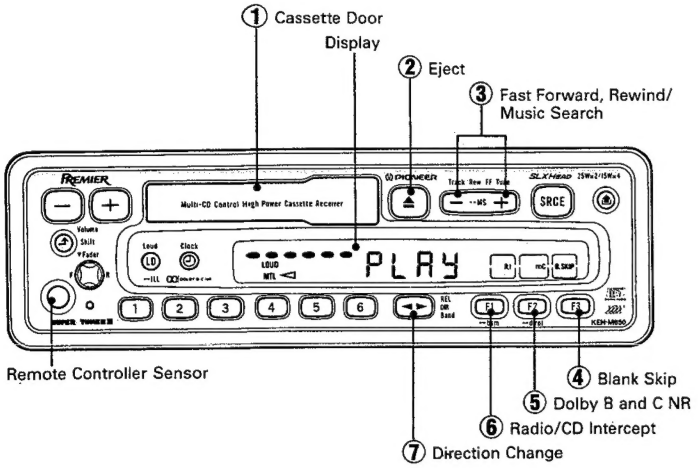
3. While the local seek sensitivity remains on the display, press the (+) side of Button ① to increase the sensitivity level, and the (−) side to decrease the level as shown below.
   FM: LOC-1 ⇄ LOC-2 ⇄ LOC-3 ⇄ LOC-4
   AM: LOC-1 ⇄ LOC-2
   The LOC-4 setting allows reception of only the strongest stations, while lower settings let you receive pregressively weaker stations.

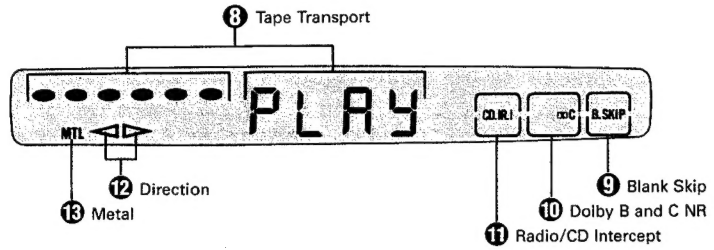
- The display of local seek sensitivity returns to the frequency when about five seconds have elapsed after the change of sensitivity.

Switching between Local and DX

Press Button ③ to switch between Local and DX (distant) seek tuning. When the frame of Local Seek ⑨ it lit, seek tuning is performed with the local seek sensitivity. Otherwise, seek tuning is performed with the DX seek sensitivity.

3. USING THE TAPE DECK





1 Insert the cassette tape into the Slot ①, and power will be turned on and the tape begin being played back.
At this time, the Tape Transport Indicator ⑧ and the Direction Indicator ⑫ will light up.

2 Adjust volume and tone (see page 3).

3 To eject the cassette tape, press the Button ②.

- Power is automatically turned off when the cassette tape has not been set within a few seconds. When this happens, remove the tape by pressing the Button ② because of a possible trouble with the tape.
- A loose or warped label on a cassette tape may interfere with the eject mechanism of the unit or cause the cassette to become jammed in the unit. Avoid using such tapes or remove such labels from the cassette before attempting use.

Changing Program

Press the Button ⑦ to change the side of tape from A to B or vice versa.

Using Fast Forward and Rewind

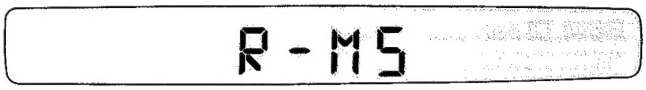
1. To forward tape fast, press the (+) side of the Button ③.

To rewind tape, press the (—) side.

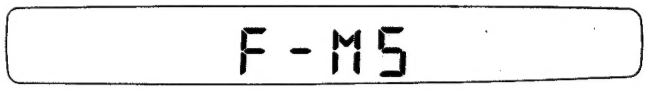
2. To release the Fast Forward or Rewind function, press the Button ⑦

Using Music Search

1. To repeat the current selection (A), press the (—) side of the Button ③ two consecutive times.



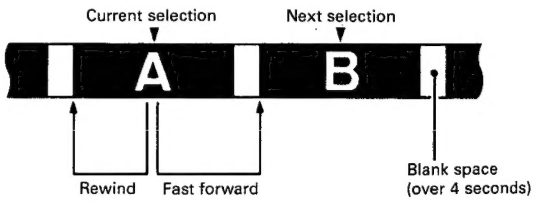
To hear the follwing piece of music (B) rather than continue the current selection, press the (+) side of the Button ③ two consecutive times. Pressing the Button ③ three consecutive times makes the normal sequence of playing resume.



2. To release the Music Search function, press the Button ⑦.

The following errors will cause the music search function to operate improperly, even though the unit is not malfunctioning.

- Unrecorded "blank" portions between selections less than 4 seconds → the blank portion cannot be detected by the unit.
- Pauses in recorded conversations longer than 4 seconds → the unit reads these as blanks between selections.
- Portions recorded at very low volume for more than 4 seconds → the unit reads these as blanks between selections.



Dolby B and C NR

Press Button ⑤ to listen to a cassette recorded using the Dolby NR system. Each press of Button ⑤ shifts the Dolby NR mode as follows:
Dolby B NR (DD and the frame at Dolby B and C NR ⑩ turn on) → Dolby C NR (DD C and the frame at ⑩ turn on) → Dolby NR off (the frame at ⑩ turns off)

Auto Tape Selector

When a cassette tape is inserted, the automatic tape selector determines the tape type, and switches between 70 μs and 120 μs equalization. When it is a metal or chrome tape, **"MTL"** ⑬ comes on. When it is a normal tape, nothing comes on.

Blank Skip

Pressing Blank Skip Button ④ turns on the frame at Blank Skip ⑨ and causes the unit to automatically fast forward to the next recorded position when a blank of about 10 seconds is detected on the tape.

Using the Radio Intercept

(When the optional Multi-Play CD Player is not connected)

Use the Radio Intercept function to hear radio while fast forwarding or rewinding.

1. Press Button ⑥ (**"R.I"** and the frame at Radio/CD Intercept ⑪ turn on.) before fast forwarding or rewinding to hear the radio.
2. To cancel the Radio Intercept function, press Button ⑥ again.

- The Radio Intercept function does not function when the Music Search or Blank Skip function is in operation.

Using Radio/CD Intercept

(When the optional Multi-Play CD Player is connected)

Connecting the optional Multi-Play CD Player adds a CD Intercept function along with the Radio Intercept function.

Each press of Button ⑥ causes the mode to change as follows:

Radio Intercept (**"R.I"** and the frame at Radio/CD Intercept ⑪ turn on) → CD Intercept (**"CD.I"** and the frame at ⑪ turn on) → Normal (the frame at ⑪ turns off)

When the Radio Intercept mode is on, the radio will be audible during fast forwarding or rewinding. When the CD Intercept mode is on, disk play will be audible during fast forwarding or rewinding.

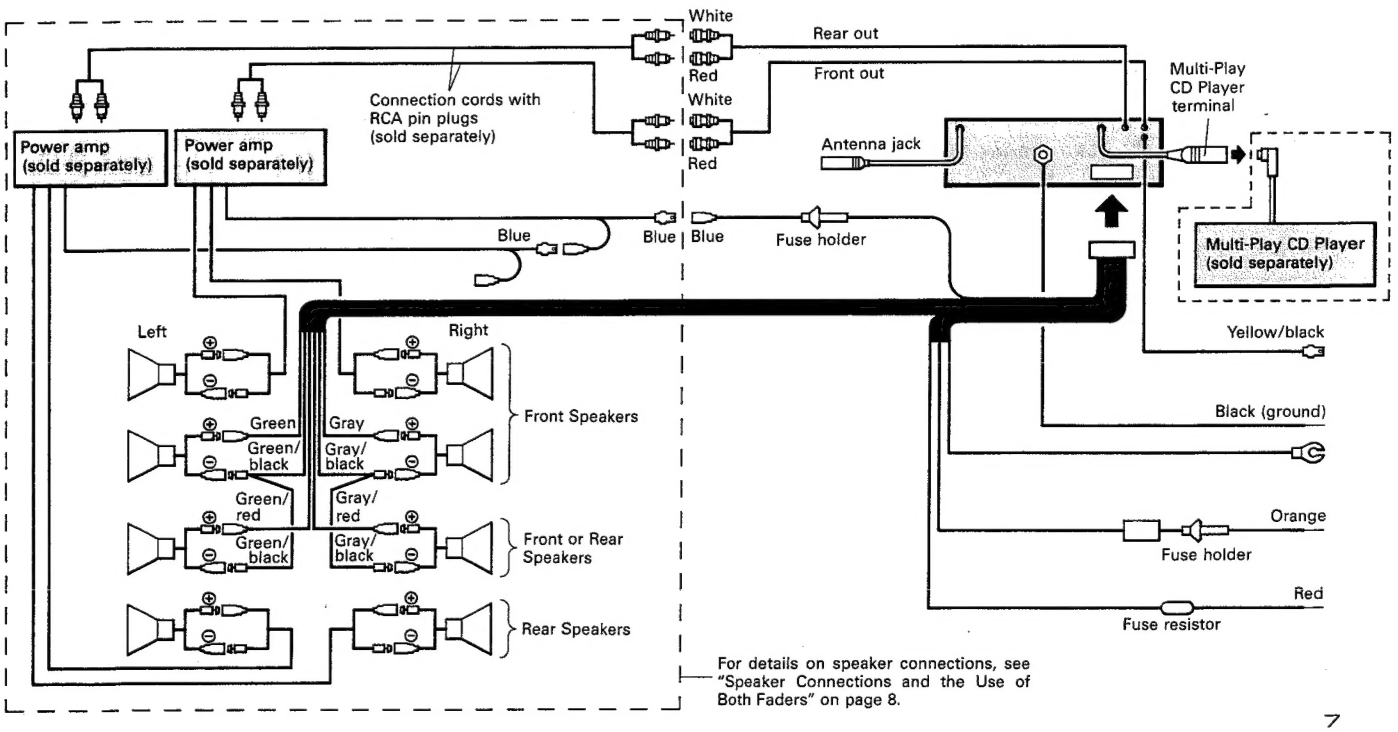
- Radio/CD Intercept does not function when the Music Search or Blank Skip function is in operation.

4. CONNECTIONS

Note:

- To avoid shorts in the electrical system, be sure to disconnect the battery ⊖ cable before beginning installation.
- Replace fuses only with the types stipulated on the fuse holder.
- Be sure to properly connect the color coded leads. Failure to do so can cause malfunctions.
- Cover unused terminals with tape to prevent electrical shorts.
- Refer to the owner's manual for details on connecting the various cords of the power amp and other units, then make connections correctly.
- If the rear or front out RCA pin jack on the unit are not being used, do not remove the cap attached to the end of the connector.
- Since a unique BPTL circuit is employed, never wire so the speaker leads are directly grounded or the left and right speaker ⊖ leads are common.
- Speakers connected to this unit must be high-power type possessing maximum input of at least 25 W and impedance of 4 to 8 ohms. Connecting speakers with output and/or impedance values other than those noted here can damage the speakers.
- When the power amp is being linked with this system, be sure not to connect the blue lead to the amp's power terminal. Likewise, when linking this system with the auto-antenna, do not connect to power terminal for the antenna. Such connection can make overcurrent cause malfunctions.

Blue	If this unit is combined with a power amp, connect its blue lead to the blue lead (system control terminal) of the power amp. If combined with an auto-antenna, connect its blue lead to the relay control terminal of the auto-antenna. (MAX. 300 mA, 12 V CC)
Yellow/Black	Cellular Mute If you use a separately sold PIONEER cellular telephone, connect it via the Audio Mute lead on the cellular telephone. If not, keep the Audio Mute lead free of any connections.
Black (ground)	To vehicle (metal) body.
Orange	To terminal always supplied with power regardless of ignition switch position.
Red	To electric terminal controlled by ignition switch (12 V DC) ON/OFF.



5. DISASSEMBLY

● Removing the Case

1. Insert and turn a screwdriver to remove the case.
2. Raise the case to remove.

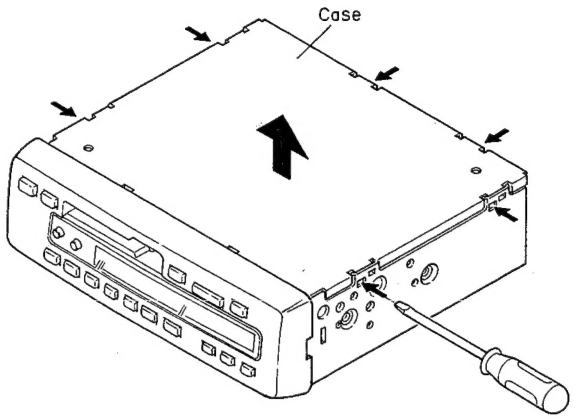


Fig. 1

● Removing the Cassette Mechanism Assy

1. Remove the four screws.
2. Disconnect the deck unit connector.
3. Remove the cassette mechanism assy.

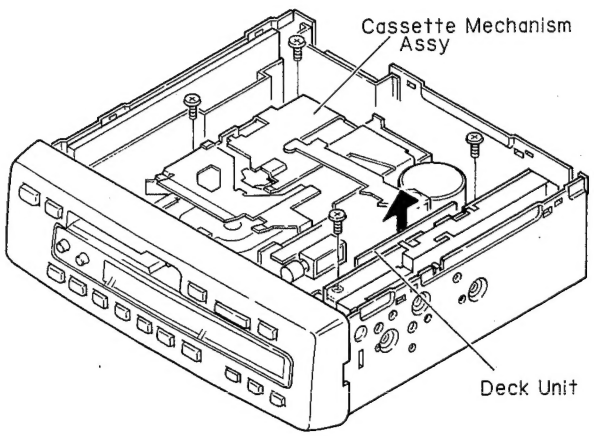

Fig. 2

● Removing the Grille Assy

1. Disconnect the two connectors.
2. Press the tabs at four locations, and then pull out the grille assy.

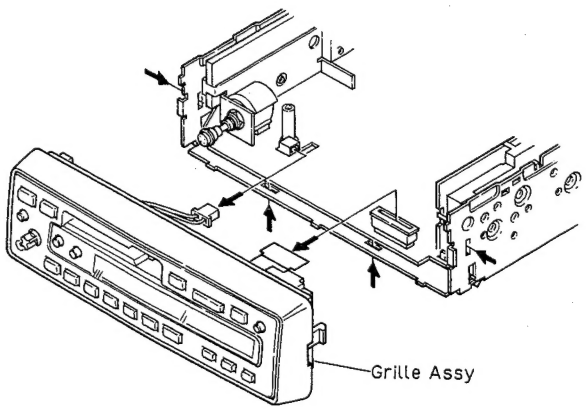

Fig. 3

● Removing the Display Unit

1. Remove the two screws and then remove the two stoppers.
2. Remove the two screws and then remove the cover.
3. Remove the display unit.

Note:
The display unit is held together by only four screws. After removing the four screws, remove the cover very carefully. If the cover is removed with too much force, there is a risk of the display unit, lens, button, etc. inside spilling out. To prevent this from happening, as there is a hook located at the part indicated by the arrow in the figure, press and then after removing the hook, remove the cover.

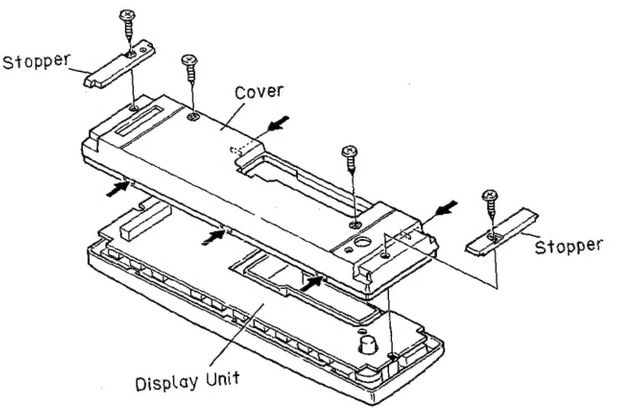

Fig. 4

● Removing the Tuner Amp Unit

1. Remove the two screws A and the two screws B.
2. Remove the screw C and then remove the holder.
3. Unbend the tabs at two locations indicated by arrows.
4. Remove the solder indicated by arrow.
5. Raise up on tuner amp unit to remove it from the chassis uint.

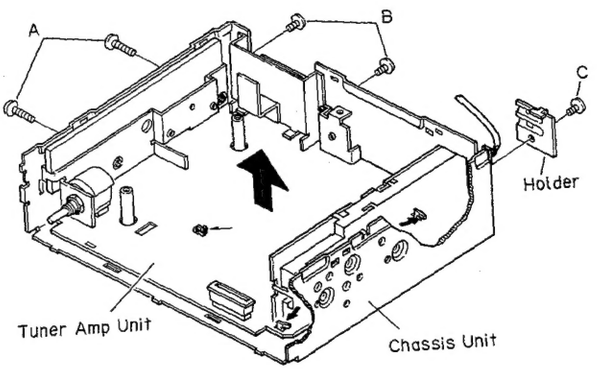

Fig. 5

6. ADJUSTMENT

TEST MODE

Test mode is mainly used in adjustment of CD multi-players (such as CDX-M40, CDX-M50).

- Switching to test mode
  While pressing the 4 and 6 keys together, switch the back-up ON or release the clear button.

- Canceling test mode
  Press the CD multi-player clear button, and then the KEH-M650 (KEH-M8200, KEH-M8250) clear button. Or, switch the CD multi-player and KEH-M650 (KEH-M8200, KEH-M8250) back -up OFF.

- Key functions during test mode
  The CD multi-player, deck, and tuner are selected by the SOURCE key.

a) CD multi-player

Key	Function
BAND/REL	Regulator ON/OFF
FF	FWD kick
REW	REV kick
F1	Tracking close
F2	Tracking open
F3	Focus close
FF+REW	Carriage/tracking switching

b) DECK
No corresponding function. Normal operation executed.

c) TUNER
During BSM operation, BSM is canceled when three station are detected.
Other keys are used for normal operations.

● Pin Function (PD4307A)

Pin No.	Pin Name	I/O	Output Format	Function and Operation
1	PLDT	Output	C	LCD driver IC and PLL IC data line
2	PLCK	Output	C	LCD driver IC and PLL IC clock line
3	$\overline{\text{ENDSW}}$	Input		Deck END sensor input
4	$\overline{\text{MTLSW}}$	Input		Deck METAL(70μS)sensor input
5	$\overline{\text{PLAYSW}}$	Input		Deck head position(PLAY)sensor input
6	$\overline{\text{NRSW}}$	Input		Deck FWD/REV sensor input
7	$\overline{\text{RST}}$	Input		Reset input
8	OSC2			Crystal oscillating element connection pin
9	OSC1			Crystal oscillating element connection pin
10	$\overline{\text{LOADSW}}$	Input		Deck LOAD/EJECT sensor input
11	DOL. B/$\overline{\text{C}}$	Output	C	Dolby NR B/C selector output
12	$\overline{\text{NR}}$	Output	C	Dolby NR ON/OFF selector output
13	$\overline{\text{DSENS}}$	Input		Front panel EJECT/REPLACE sensor input
14	PCE	Output	C	Chip enable output for PLL IC (IC501:LC7218M)
15	$\overline{\text{LINH}}$	Output	C	INH control output for LCD driver IC(IC901:LC7582A)
16	LCE	Output	C	Chip enable or strobe output for LCD driver IC(IC901:LC7582A)
17	VDT	Output	C	Data output for electronic volume IC(IC707:HFE701F008X2)
18	VCK	Output	C	Clock output for electronic volume IC(IC707:HFE701F008X2)
19	VST	Output	C	Strobe output for electronic volume IC(IC707:HFE701F008X2)
20	T. ANT	Output	C	Not used
21	$\overline{\text{DMUTE}}$	Output	C	Deck mute output
22	MUTE	Output	C	System mute output
23	TAPPW	Output	C	Deck power supply control(Not used)
24	TUNPW	Output	C	Tuner power supply control
25	SYSPW	Output	C	System(power amp)power supply control
26	VSS			GND
27	$\overline{\text{AUXB}}$	Input		AUX B sensor input
28	$\overline{\text{ASENS}}$	Input		ACC power supply sensor input
29	$\overline{\text{BSENS}}$	Input		BACK UP power supply sensor input
30	$\overline{\text{REMIN}}$	Input		Remote control pulse input
31	PDI	Input		Data input for PLL IC (IC501:LC7218M)
32	TEST. I	Input		Test program input
33	TEL MUTE	Input		TEL mute input
34	SDLEV	Input		Signal level input
35	AM IF	Input		AM IF count input
36	D. EJECT	Input		Front panel EJECT sensor input
37	SOL1	Output	C	Output for deck solenoid 1 (head position)
38	NRO/PCL	Output	C	Deck FWD/REV head selector output/PCL clock output
39	SOL2	Output	C	Output for deck solenoid 2 (DIR selector and EJECT)
40	PEE	Output	C	Beep tone output
41	BSI	Input		Bus serial data input
42	BSO	Output	C	Bus serial data output
43	$\overline{\text{BSCK}}$	Input/Output	C	Bus serial clock input/output
44	$\overline{\text{MSIN}}$	Input		MS pulse/ Blank sensor input
45～48	$\overline{\text{KD3}}$～$\overline{\text{KD0}}$	Input		Key return input
49	KST0	Output	NM	Key strobe output
50	KST1	Output	NM	Key strobe output
51	NC			
52	$\overline{\text{BUSPW}}$	Output	NM	Bus power output
53	$\overline{\text{AUXR0}}$	Output	NM	AUX remote control output 0
54	$\overline{\text{AUXR1}}$	Output	NM	AUX remote control output 1
55	$\overline{\text{DCONT}}$	Output	NM	SWD VDD for key control IC(PD4285)
56	$\overline{\text{LCDPW}}$	Output	NM	LCD power supply control
57	NC			
58	VDD			
59	$\overline{\text{BRXEN}}$	Input/Output	C	Bus reception enable line
60	$\overline{\text{BSRQ}}$	Input/Output		Data communications serial poll request
61	BRST	Output	C	Bus reset
62	DISB	Output	C	AUX control output (Not used)
63	DILM	Output	C	Illumination green/amber selector output
64	MOTO	Output	C	Deck main motor control output

Output Format	Meaning
C	CMOS Output
NM	Neutral resistivity N channel open drain
